Synthesize and Share Our Biodiversity Conservation Efforts to Improve Impact

Project Title	Synthesize and Share Our Biodiversity Conservation Efforts to Improve Impact
Project Summary	Develop your creative and analytical skills to evaluate and display our biodiversity conservation efforts to improve our global outreach and impact.
Country	United States

Project Description

Interested in learning about biodiversity conservation and its foundational role in international development? Want to enhance understanding of our impact on biodiversity conservation and natural resources management? Then this is your project. You'll master the current and historic drivers threatening biodiversity and approaches to mitigate them. You'll sharpen your skills in graphic web design, qualitative content analysis, and mapping. You'll engage with a diverse and passionate group of folks in the Forestry and Biodiversity Office.

Your tasks will be twofold and include: 1) Review and summarize current and past biodiversity projects in an interactive visual timeline to facilitate understanding of the evolution of our work priorities and the identification of potential gaps . This could include GIS mapping. 2) Synthesize evidence of uptake and use (and gaps) of best practice for biodiversity conservation by USAID Missions.

Biodiversity loss is eroding the very foundations of th
